## Academic projects:

### Main Project: ONLINE PAYMENT FRAUDS DETECTION using machine learning

Note: Online payment fraud has been identified as one of the leading frauds in the past few decades, In this research paper, we discussed the concept of online payment fraud. It was seen that feature selection techniques are very important and can be implemented to attain lower false positive rate. I implemented various machine learning algorithms like logistic regression, random forest in order to predict if a particular transaction is fraudulent or not.

### PROJECT: EWHEELZ -ONLINE BUS RESERVATION

“EWHEELZ” - This project is useful to reserve the bus tickets in the online of any type of travel. This project is more advantageous to all travels. All passengers are may feel very easy to reserve the bus ticket.
